

COFFEE BREWER

INFUSION SERIES™

ICB

The new BUNN® 1-gallon Infusion Series™ Coffee Brewer (ICB) incorporates BrewWISE® technology, digital display for easy programming, and brews into 1 or 1.5 gallon servers.

The BrewWISE intelligence digital system will store a variety of coffee brewing recipes. And pre-infusion and Pulse-Brew™ technology allow you to get maximum flavor extraction. By pre-setting the three coffee profile selection buttons, you ensure that your customers will receive the same great coffee every time.

The ICB allows you to brew full or half batches directly into a 1-gallon airpot or a 1 or 1.5 gallon baseless ThermoFresh® server. Easily transport these servers to meeting rooms, breakfast bars or any other remote locations.

INFUSION™
SERIES

Easy-to-service machine with front and top access to all components.
